

## Badamid<sup>®</sup> / Badadur<sup>®</sup> / Badaform<sup>®</sup> / Badalac<sup>®</sup> / Badaflex<sup>®</sup>

### RoHS Directive 2011/65/EU

Based on our investigation and on the information provided to us by our raw material suppliers, the current materials supplied by Bada AG in the product families

#### **Badamid<sup>®</sup> / Badadur<sup>®</sup> / Badaform<sup>®</sup> / Badalac<sup>®</sup> / Badaflex<sup>®</sup> / Badaprop<sup>®</sup>**

do neither contain any of the substances listed below as intentional additives, nor are any of these substances generated during processing except where explicitly otherwise stated in the technical data sheet or the material safety data sheet of the respective grades:

- *Hg*                      *mercury and its compounds*
- *Pb*                        *lead and its compounds*
- *Cd*                        *cadmium and its compounds*
- *Cr(+VI)*                *hexavalent chromium compounds*
- *polybrominated diphenyl ethers (PBDEs)*
- *polybrominated biphenyls (PBBs)*
- *Penta-, Octa- or Deca- BDEs*
- *DEHP*                  *Di(2-ethylhexyl)phthalat*
- *DBP*                    *Dibutylphthalat*
- *DIBP*                  *Diisobutylphthalat*
- *BBP*                    *Benzylbutylphthalat*

Therefore, the above mentioned materials comply to the best of Bada AG's knowledge to the RoHS „Restriction of Hazardous Substances“ directive 2011/65/EU (except where otherwise stated).

### Contact

In case of questions, please feel free to contact Bada AG. The technical department remains at your disposal.

### For Notice

The information given above was compiled carefully and represents the state of Bada AG's knowledge and results of our investigation at issue date. The information are based on the data provided by our raw material suppliers

Some substances are ubiquitous or can be found in traces in the various ingredients. The observance of the substances mentioned above is not part of Bada AG's ongoing quality inspection.

Former versions of this document become void with the publication of a newer version. Please ensure to have the latest version available.

This document is valid for originally packed material supplied by Bada AG. With respect to the significant influence of processing conditions, the recipient of material supplied by Bada AG is obliged to carry out own tests and perform own investigation to ensure the suitability of the material for the specific application or purpose. No guarantees for specific properties are given with this document. It is the responsibility of the recipient of the material to ensure that existing laws and legislation are respected.
